What is the Punjab Electric Taxi Scheme 2025?

The Chief Minister Maryam Nawaz Punjab Electric Taxi Scheme 2025 is a government-backed scheme that is well-designed to:

- Provide eco-friendly electric taxis and bikes to the people.
- Enable ownership through easy and interest-free installments.
- This project will provide employment to unemployed youth and low-income families.
- Electric transport will reduce pollution and reduce the cost of petrol.

It will modernise Punjab's transport and provide economic, social and environmental benefits to the citizens. Key highlights of the scheme.

Key Highlights of the Scheme

Official rollout start date within 15 days (early 2025)

Vehicles offer electric taxis and electric bikes.

100% interest-free installment plans

Employment impact Thousands of jobs for unemployed youth

1000 EV charging stations across Punjab

Target of 80% transport network electric by 2030

This makes Punjab the first province in Pakistan to launch EV taxis on such a large scale under a government scheme.

Key Benefits of Punjab Electric Taxi Scheme 2025

Opportunity to get affordable rides

Taxi or motorbikes will be available on interest-free installments so that low-income people can easily own their own ride.

Employment for youth

This scheme will create thousands of new jobs for drivers, mechanics and staff maintaining electric vehicles.

Clean and eco-friendly Punjab

Electric taxis will reduce smoke and carbon, which will reduce air pollution and climate problems.

Reduction in fuel costs

Punjab will be able to save billions of rupees by using electricity instead of petrol and diesel.

Network of charging stations

1,000 charging stations will be set up across Punjab so that both drivers and passengers can get fast and easy facilities.

Punjab Transport Vision 2030

This project is not limited to electric taxis alone, but is a major roadmap to modernize Punjab's transport system. These include:

Lahore Tram Service

- Start: February 2026
- First Route: Jail Road and Main Boulevard

Electric Buses

- Start: December 2025
- Target: 1,100 buses and trams to be operated by 2030

Modern Depots

- 41 new depots will be built to better manage transport

Autonomous vehicles

- There are plans to trial self-driving vehicles in the coming years.
- With this roadmap, Punjab aims to revolutionize public transport by bringing it closer to world standards.

Sustainability goals

The government has set clear sustainability goals:

- 80 percent of Punjab's transport system will be electric by 2030.
- Reducing air pollution levels in urban centers like Lahore, Faisalabad and Rawalpindi
- Reducing dependence on imported fuel
- Encouraging adoption of renewable energy in charging stations

The Electric Taxi Scheme 2025 is expected to be the foundation of this transformation.

Sindh's Parallel Initiative

- Along with Punjab, eco-friendly transport will be introduced in Sindh as well. Sindh Workers Welfare Board will provide 10,000 free electric motorcycles to female employees.
- According to Sindh Labour Minister Shahid Thahim, the initiative aims to empower women and promote eco-friendly mobility.
- This shows how Pakistan's provinces are competing to move towards sustainable urban transport.

Who can apply for the Punjab Electric Taxi Scheme 2025?

The government will soon release the complete conditions, but the possible eligibility may be:

- The applicant must be a resident of Punjab.
- Possess a valid National Identity Card (CNIC).
- Preference will be given to unemployed or low-income youth.
- Taxi drivers must have a driving license.
- A guarantee of timely payment of installments must be given.

Why is this scheme important in 2025?

A guarantee of timely payment of installments must be given.

- Expenditure on petrol and diesel will be reduced and travel with electricity will be cheaper.
- Punjab will get a clean and eco-friendly transport system.
- The government will save billions of rupees on fuel imports.
- A network of modern charging stations will make transport more convenient and reliable.
- The world is moving towards electric things and Punjab cannot lag behind.
- This scheme connects Pakistan to the global trend of EV adoption.
- Cost-effective transport will be provided to citizens.
- Empowers local people through ownership and income.

Conclusion

The **CM Punjab Electric Taxi Scheme 2025** is a major milestone toward sustainable and modern transport in Punjab.
