

Prison Industry Mardan 2025: A Thriving Hub for Rehabilitation and Economic Growth

Description

Prison Industry Mardan has created a strong and large prison industry in which not only prisoners are trained to work but also helped in finding a good and better job. The prison has a marble industry and terracotta manufacturing units where prisoners manufacture goods and also gain experience in working. This facility provides two benefits to the prisoners in the prison. One is to highlight their working capacity and the other is to increase industrial production. Thanks to this program, prisoners can be able to get a good job.

[illegible]

Vocational Training and Industrial Development

Prison Industry Mardan focuses on skill development and **industrial production**, helping inmates build a secure future.

Key Prison Industry Mardan Jail

Marble Industry and Terracotta Manufacturing

- Prisoners manufacture goods and gain experience in working.
- This facility provides two benefits: highlighting their working capacity and increasing industrial production.
- Thanks to this program, prisoners can be able to get a good job.

Hand Embroidery and Tailoring

- Hand embroidery and sewing of clothes are also included.
- Prisoners do beautiful embroidery and produce clothes of different designs.
- These projects increase the skills and habits of working meticulously.
- They can start their own business and also get a good and better job.

Employment and Social Reintegration

- The products produced in the industry in the prison are available for purchase at the **Khaksar Store Mardan** and the **display centers near the Central Jail Mardan**.
- This allows the prisoners in the prison to showcase their skills and earn a good income.
- This proves to be a useful tool for them and for reintegration into society.
- By participating in modern work, prisoners not only gain experience and self-confidence, but they also establish a new purpose in their lives.
- This proves to be very useful for them when they take a new step in society after leaving prison.

Conclusion

Prison Industry Mardan provides prisoners with practical training, employment opportunities, and financial independence. By learning valuable skills in **marble, terracotta, embroidery, and tailoring**, inmates prepare themselves for a successful life after release. This initiative not only improves their economic stability but also plays a vital role in reducing crime rates and ensuring a positive reintegration into society.
